**\*\*THIS IS NOT A GUIDE FOR APPLICATION\*\***

**\*\*PLEASE READ ALL DIRECTIONS ON PRODUCT LABEL BEFORE USE\*\***

## Happy Frog ® Soil Conditioner

Happy Frog Soil Conditioner contains aged forest products, earthworm castings, bat guano, and soil microbes to enhance your soil, encourage nutrient uptake, and promote root growth.

[More information](#)

## Fox Farm ® Ocean Forest Potting Soil

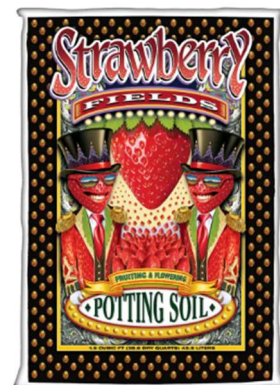

Ocean Forest is a blend of aged forest products, peat moss, earthworm castings, bat guano, fish emulsion, and crab meal. This is a light soil packed with nutrients to help your plant get started.

[More information](#)

## Happy Frog ® Strawberry Fields Potting Soil

Helpful in encouraging flower or fruit production, Strawberry Fields is packed with coir, peat moss, aged forest products, perlite, and fertilizer.

[More information](#)

## Open Sesame ® Soluble Fertilizer

Open Sesame is a phosphorus-high fertilizer that is used during flowering to support blooms and buds. It works at the plant's root systems to encourage nutrient intake.

[More information](#)

## Coconut Coir

This natural fiber extracted from coconut husks has great water retention and aeration to amend your soil and promote root growth.

[More information](#)

## Bonide ® Captain Jack's Neem Oil

Neem Oil is used as an insecticide, miticide, and fungicide, killing all stages of insects. It can be used on flowers, vegetables, herbs, roses, trees, shrubs, and houseplants.

[More information](#)

## Bonide ® Fung-onil Fungicide Concentrate

The active ingredient, chlorothalonil, prevents many fungal diseases that are common in plants (leaf spot, rust, blight, rot, mildew, mold, etc.). It can be used on flowers, fruits, vegetables, trees, and shrubs.

[More information](#)

## Bonide ® Captain Jack's Insecticidal Super Soap

This formula can be used to kill insects and mites on vegetables, fruit, berries, herbs, ornamental plants, and greenhouse plants. It also works well to kill powdery mildew.

[More information](#)

## Fertilome ® Tree & Shrub Drench

Tree & Shrub Drench is dissolved in water, moves through the soil, and is absorbed by a plant's roots to move up through the shrub or tree to provide systemic protection.

[More information](#)

## Fertilome ® Spinosad

Spinosad controls worms and caterpillars. On vegetables, fruits, and citrus it can kill Leafminers, Borers, Leaf Rollers, Worms. On Ornamental trees, shrubs, and flowers it can kill webworms, bagworms, and tent caterpillars.

[More information](#)

## Fertilome ® Root Stimulator

Root Stimulator can be used when planting new trees, shrubs, and flowers to stimulate root formation. It reduces transplant shock and helps new plants to be more vigorous.

[More information](#)

## Espoma Bio-tone ® Starter Plus

Bio-tone Starter Plus helps plants establish quicker, promoting deeper roots, faster growth, and bigger blooms. Can be used when planting flowers, vegetables, trees, and shrubs.

[More information](#)

## Espoma Holly-tone ®

Holly-tone works as food for any acid-loving plants, especially Azaleas, Rhododendrons, and Camellias. It enhances a deeper green leaf color and bigger blooms.

[More information](#)

## Espoma Garden-tone ®

Garden-tone is used for feeding your herbs and veggies with an enhanced blend of ingredients.

[More information](#)

## Espoma Iron-tone ®

A lack of iron in the soil causes a plant's leaves to yellow if it cannot produce enough chlorophyll. Iron-tone is used to help turn yellow back to green!

[More information](#)

## Espoma Bone Meal ®

Bone Meal provides nitrogen, phosphorus, and calcium that helps develop a plant's root systems and promotes plant growth.

[More information](#)

## Espoma Blood Meal ®

Blood Meal provides an organic source of nitrogen that promotes growth and greener leaves. This supplement works on both annuals and perennials.

[More information](#)

## Espoma Soil Acidifier ®

Soil acidifier helps to lower the pH of your soil—commonly used to make your Hydrangea blooms blue. It's also helpful when planting blueberries or other berry plants.
